

EMERGENCY CALL OUT SERVICE - 3 HR RESPONSE TIME NATIONWIDE

LIQUID WASTE MANAGEMENT

GREASE TRAPS

McBreen Environmental are specialists in Grease Trap Management, offering excellent service contracts at very competitive rates to Hotels, Restaurants, Golf Courses, Guest Houses and all other food service establishments.

Before

After

Waste fats, oils and greases from food service establishments cannot be treated in the wastewater system and must be kept out of the sewers.

McBreen Environmental are permitted waste collectors so you have peace of mind knowing all work carried out is by fully trained and qualified operatives, using the latest technology, and all in accordance with the latest regulations. In addition to the cleaning of Grease Traps, McBreen Environmental can supply a dosing unit to help prevent build-up of grease in your drains. **We guarantee trouble free greasetrap and free running drains with our tailored maintenance contracts.**

We can set up maintenance contracts to suit your individual requirements, ensuring that your business remains fully compliant with Health & Safety, and Environmental regulations.

BIO-DEGREASER

Bio-Degreaser is a bio enhancement product system for eliminating the build-up of troublesome grease and fats in restaurants, hotels, canteens and other areas with problems caused by organic matter in drainage systems. It is a safe, economic and proven method compared to alternatives.

- Your waste will be disposed of at our very own Composting Facility
- Our Geopal technology can provide you with live information regarding waste management
- We will provide you with a SLA, tailored to your specific requirements

SEPTIC TANKS

Make life easier with McBreen Environmental annual service contracts and avail of our preferential rates all year round.

Our offer to you with every Septic Tank Empty:

- Free 10-point health check
- Discounted rates for repeat customers
- Experienced & fully trained operatives
- Visits to suit your schedule

FORECOURT SERVICES - OIL INTERCEPTOR CLEANING

McBreen Environmental Forecourt services include:

- Car Wash Cleaning - limited down time
- Emergency Oil Spill Clean Up
- Diesel & Storage Tank Cleaning
- Oil Interceptors
- Certified Waste Disposal

MOBILE DEWATERING

McBreen Environmental have invested in a highly effective dewatering system, which typically reduces volumes by around 60-90%. This system can be used for dewatering small domestic tanks right up to dewatering larger scale water treatment plants. We also have a number of mobile screening units which cater for projects of any scale.

BULK WASTE REMOVAL

McBreen Environmental are specialists in bulk waste removal and storage tank cleaning. We provide bulk removal services that are safe, reliable and cost-effective. They are also in full compliance with all regulations. Our vacuum trucks are available to load and transport your solids, liquids, sludge or slurry for long-term disposal. These specialty vehicles remove contaminated soils and take care of spills. They also remove drilling mud, drilling cuttings and brine water.

ADR & HAZARDOUS WASTE

Our ARD Units can transport dangerous goods. These are substances and articles which have been identified as hazardous and present a risk to people, property and the environment. Our ADR Units can be operated in all environments. Drivers are Hazchem-trained and certified.

ULTRA HIGH PRESSURE JETTING

Hydrodemolition is a concrete removal technique which utilises ultra high-pressure water at pressures up to 45,000 psi to remove deteriorated and sound concrete to expose reinforcement bars for repairs and or replacement. This process provides an excellent bonding surface for repair material. Ultra High Pressure Water Jetting is also suitable for the removal of coatings as opposed to abrasive or shot blasting prior to new coating applications and for the safe removal of lead based coatings.

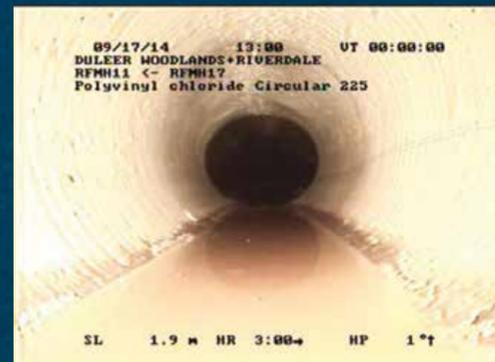

Drain/Pipe Rehabilitation

GUARANTEED DESIGN LIFE OF 50 YEARS ON ALL OUR DRAIN LINERS

McBreen Environmental dedicated sewer rehabilitation department have access to the latest technology and as a result are now firmly established as one of the leading sewer re-lining companies in Ireland.

LOCALISED PATCH REPAIRS

CIPP DRAIN LINING

ROBOTIC CUTTER

Our No-Dig technology is the fastest and most cost-effective way to repair a damaged drain or sewer with minimum disruption.

MANHOLE/TANK LINING

BUND-LINING

McBreen Environmental offers a bund inspection, maintenance and relining service to ensure your facility complies with legislation. We have experience of working on numerous projects in both the pharmaceutical and dairy industry.

TOP HAT SYSTEM

EMERGENCY CALL OUT SERVICE 3 HR RESPONSE TIME NATIONWIDE

MAPPING AND SUS SURVEYING

- STC and SUS Surveying
- Infonet Services
- GPS Surveying
- Drainage and Services Mapping
- GPR Surveying

CONCRETE INJECTION

This is used to stop and prevent infiltration in the manholes and concrete structures, by injecting our polyurethane resin into the structure - it stops leaks and provides a structural membrane behind the chamber.

MAIN FEATURES:

- Polyurethane resin injection which, when in contact with water, expands rapidly, stopping leaks within minutes
- Ideal for brick and concrete structures
- Environmentally friendly
- Non-disruptive sealing of leaks
- Places impermeable coating outside structure
- Stays permanently flexible
- Resists ground water pressure
- Effective against high flows
- Impermeable to water, allows diffusion of water vapour
- Resistant to server sulphate attack and PH of 3.5

CCTV PIPE LINE INVESTIGATION & MAPPING

Advantages of carrying out CCTV Pipeline Investigations:

- CCTV Surveys and integrity tests from 2" to 1800mm gravity or pumped lines
- Wincan Reports generated
- Autocad Drainage Drawings produced
- Check for structural damage
- Propose remedial work if necessary using our no-dig technology
- Laser Profiling of pipes & sewers
- Our CCTV investigations identify problems before they become serious
- EX Rated CCTV Cameras for use in pharma & petroleum industry

INTEGRITY TESTING

McBreen Environmental only use computerized Sklarz integrity testing equipment.

This equipment allows us to:

- Test all diameter pipes using either air or water.
- Produce on site comprehensive reports outlining the present condition of the pipes.
- Maintain (IPPC) licenses with required regular integrity testing

What do we test?

- Drainage systems
- Pipe runs
- Manholes
- Pumping Stations
